---

<div align="justify">Just beware of this Celcom contest. If you are not ready to part away with a hefty mobile bill, then please stay away from this contest. The NCCC has received way too many complaints on this issue. <br />♦<br />Lets give some thought to this opinion: I think this should apply to all companies.<br />♦<br />"In this era of high food and fuel prices, government-linked companies (GLCs) like Celcom should play their role to educate the public on how to save money and reduce expenses. They should not just think of their own profits<br />and organize activities like this which only benefits themselves at the rakyat's expense".<br /><br />Thank you<br />♦<br />Darshan Singh<br />Director-NCCC<br /><br />"Treat Others The Way You Want Others To Treat You"</div>
